Southeast Asia is one of the world’s overlooked archaeological wonders. This course reviews the archaeology of Southeast Asia from the Pleistocene onward. As global interest grows in Asia and the entire Pacific Rim, so, too, has interest developed in the archaeological record of this region. In this course, we explore particularities of the Southeast Asian cultural sequence compared them with developments found elsewhere in the world. We examine four key changes through the developmental sequence: (1) the appearance of the first hominids, (2) the origins and timing of plant and animal domestication, (3) the timing and impact of early metallurgy in Southeast Asia, and (4) the emergence of sociopolitical complexity. We view these transitions in terms of general ecological adaptations, and frame our explanations of these transitions through a comparative archaeological perspective. We discuss methodological and theoretical issues germane to Southeast Asian archaeology, from uses of ethnographic analogy and historical records as data sources to applications of anthropological notions of ethnicity, culture change, and political economy to the archaeological record. By the end of this course students will be able to:

1. Understand how archaeological research is undertaken to study the development of ancient societies in Southeast Asia;
2. Describe the basic historical sequence in Southeast Asia from the Pleistocene to c. AD 1400.
3. Characterize variability in the trajectories that mainland vs. island societies experience in transitions to food production and sociopolitical complexity.
4. Recognize key archaeological sites that contribute to our knowledge of human origins, food production, the origins of metallurgy, and the earliest urbanism in Southeast Asia;
5. Demonstrate information and literature search skills in conducting their background research for their class presentation;
6. Acquire basic abilities in critical thinking and reasoning as applied to Southeast Asian archaeological problems and issues.

READING ASSIGNMENTS: We will use various articles and two volumes: (1) Charles Higham’s (2002) Early Cultures of Mainland Southeast Asia (River Books, Bangkok) and (2) Peter Bellwood and Ian Glover’s (2004) Southeast Asia: from Prehistory to History (RoutledgeCurzon, paperback version). Readings will be available through our ANTH 461 Laulima website under the “Resources” link, and organized by week. Full references are also provided in this syllabus in case you want to photocopy them directly from their source volumes.

COURSE REQUIREMENTS: This is a writing-intensive course, so writing assignments are integral to the course and are designed to help students learn about the history and practice of Southeast Asian archaeology.

Students are required to write two 2-3 page, double-spaced documentary synopses in Weeks 2 & 3 of the class, a take-home essay-based final examination (which involves a first draft, instructor feedback and optional revised draft), prepare and present one (1) class presentation
(which includes preparing written material for distribution to classmates), and attend class. Each of the two documentary synopses should be 2-3 double-spaced pages; it should summarize the main points of the documentary, and discuss its relevance to other issues under consideration (in the assigned readings and class lectures). To receive full credit, your class presentation essay must include 3-4 double-spaced pages of text, at least one page of illustrations (locational map, chronological chart, images of artifacts, etc.) and a single "References cited" page at the end. There is no mid-term examination in this course.

Class attendance and participation count in the grading process. Students who participate and attend 90% of the class sessions get 15 points; those with 80% attendance get 10 points; those with 70% attendance get 5 points; students who attend less than 70% of the class sessions get no credit. Absences will only be excused when documented by doctor’s notes or other methods.

Grades will be calculated according to the following system:

<table>
<thead>
<tr>
<th>Assignment</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Documentary synopses (2 x 15 points): First Peoples: Asia &amp; Village of Jars</td>
<td>30</td>
</tr>
<tr>
<td>Take-home final essay exam (30 points)</td>
<td>30</td>
</tr>
<tr>
<td>Class presentation (10 for oral presentation; 15 for written paper)</td>
<td>25</td>
</tr>
<tr>
<td>Class attendance &amp; participation</td>
<td>15</td>
</tr>
<tr>
<td><strong>TOTAL POINTS</strong></td>
<td><strong>100 POINTS</strong></td>
</tr>
</tbody>
</table>

Please note: graduate students will attend this class as part of their ANTH 641 course, and will also present lectures in class. Material in their lectures is as important as material in Dr. Stark’s lectures.

SPECIAL NOTES: Assignments must be submitted in a timely fashion. Barring emergencies, 10% will be subtracted from the assignment each day after the due date. All assignments must be completed to receive a passing grade in the course.

Disability Access: Students with disabilities and related access needs are encouraged to contact the UHM KOKUA Program for information and services. Services are confidential and students are not charged for them. Contact KOKUA at (V/T) 956-7511 or (V/T) 956-7612 or kokua@hawaii.edu. KOKUA is located on the ground floor, Room 013 of the QLC Student Services Center; Monday – Friday 7:45 a.m. – 4:30 p.m.

Guidelines for Writing ANTH 461 Essays

This class involves several writing assignments, including two take-home exams and one 4-5 page essay to accompany your class presentation that you will distribute to the class. The following are several important points to keep in mind in writing all required essays for this course.

1. Create an outline before you begin to write. Compare and contrast ideas in the various readings, and organize your discussion thematically.

2. Begin with a clear introductory paragraph that lets the reader know what you are going to accomplish in the paper; be sure to emphasize cross-cutting themes in the course readings.

3. Begin each paragraph with a topical sentence that lets the reader know what the content of the paragraph will refer to. Short and snappy topical sentences catch the reader's eye and provide a concise way of summarizing what is to come afterward.

4. Reread your work and edit it closely before handing in the final paper. Check for incomplete sentences and for awkward constructions. Reading your paper out loud to yourself is helpful. If you are not comfortable with your writing, talk to your teaching assistants or professors.

5. Cite your references correctly. Remember that all discussions of a person's ideas or direct quotes from their work should include an in-text reference (e.g., Relethford 1994:254). At the end of the paper you should have a References Cited section with the full reference to the work, including the author, date, title, publisher, and publisher's location. See the following notes for the correct way to cite and reference publications.

Some Notes on Citations

Properly citing sources used in essays is an essential writing skill and the foundation of good scholarship. A "References cited" section allows others to find these sources easily and also acknowledges others' hard work. Failing to adequately cite other scholars' ideas is a form of theft. There are several situations in which one needs to cite specific ideas or quotes, and examples of each situation are provided below.

Examples of direct quotes:

The late Pleistocene of Beringia may be characterized by, “two or more very distinct cultural groups” (Kunz and Reanier 1995:25.)

Example of a specific idea or concept:

The Upper Paleolithic assemblage from Jebel Humeima, southwest Jordan, in many ways reflects a Nunamiut “winter camp,” as described by Binford (1991:46-48.)

In other instances, specific reports, figures, general idea(s), or theoretical perspective(s), should be acknowledged. Depending on what is cited, the page number may, or may not, be required.

Reference to a specific report or figures:

Examples of extreme intra-site technotypological variability have also been noted at the central Negev site of Boker where distinct clusters of tools and debitage associated with the Early Ahmariam were observed (Marks and Ferring 1988:60).

Reference to general ideas or theoretical perspectives:

Wiessner’s ethnographic work (1983, 1984) with South African hunter-gatherers has influenced how archaeologists identify and envision the concept of style.
As one of the architects of post-processual archaeology, many of Ian Hodder’s theoretical works (e.g., 1982, 1986) are both championed and criticized.

Remember to acknowledge specific ideas, phrases, or figures from readings in your essay. General knowledge does not need to be cited (e.g., Australopithecine skeletal remains are found only in Africa). When in doubt, however, acknowledge your source.

Conventions for “References Cited” section

List references in alphabetical order by author’s last name and include the following kinds of information: author(s), publication date, book chapter or article title, book or journal title, place of publication (if book), editor name (if edited book), page numbers (if chapter or journal article). Book and journal titles should be italicized.

Examples of journal bibliographic citations:

Stark, Miriam T.

Examples of book bibliographic citations:

Hodder, I.

Examples of book-section bibliographic citations:

Bellina, Bérénice and Ian Glover

Miksic, J.N.

NB: you may use internet sources for images to illustrate your presentation, but do not use internet sources to write your essays except in presentations that refer you directly to a URL. Instead rely on published material in journals, books, and other hard-copy print sources.
